

for ODROID-C1

This ODROID-C1 Shield makes it easy to use

- Blue and white 16x2 Character LCD.
- 7 x Blue LEDs
- 2 x tact switches
- 4 x 6pin IO ports

Dimension : 85 x 56mm (3.35" x 2.2")

Schematics : [DOWNLOAD HERE](#)

This shield is perfect for when you want to build a stand-alone project with its own user interface.

The 2 buttons allow basic control without having to attach a bulky computer.

7 LEDs can be used as a level meter of system resources.

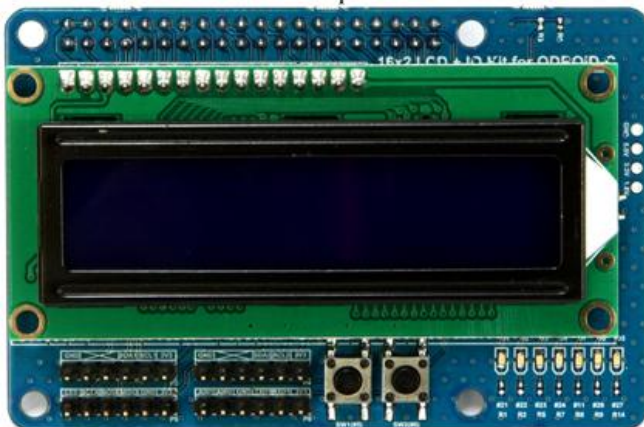

6pin header connector is compatible with our [Weather board](#).

On the bottom side, there is a rubber bumpon which makes it a little more mechanically stable.

The example code and library can be found in our Wiki and Github repo.
