### Pan and tilt

Pan and tilt function allows the camera to rotate around both of its axes, 340 degrees horizontally, and up to 50 degrees vertically. With a combination of the high-quality, wide field of view lens TESLA Smart Camera Baby 250 will always find the right angle, to see what needs to be seen.. Also, the motion tracking features let you follow the action, whether a pet racing around the living room or a youngster toddler toward trouble.

### 2K Resolution

The TESLA Smart Camera Baby B250 uses a 1/2.8" 3Megapixel CMOS sensor with a variable frame rate. This means, that you will always achieve a sharp image with plenty of details. And when night comes, thanks to the IR light, you will still get high-quality footage.

### Tesla Smart for Android and iOS

### Motion and sound detection

TESLA Smart Camera Baby B250 is not only a house protector but a powerful helper. Smart sound and motion detection helps you know whedetecionn your baby's crying or somebody break-ins.
