10A TRIACs

SNUBBERLESS™ & STANDARD

**Table 1: Main Features** 

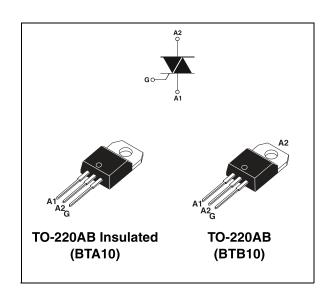

Symbol	Value	Unit

V <sub>DRM</sub> /V <sub>RRM</sub>	600 and 800	V
I <sub>GT (Q₁)</sub>	25 to 50	mA

#### **DESCRIPTION**

Available either in through-hole or surface-mount packages, the **BTA10** and **BTB10** triac series is suitable for general purpose AC switching. They can be used as an ON/OFF function in applications such as static relays, heating regulation, induction motor starting circuits... or for phase control operation in light dimmers, motor speed controllers,...

The snubberless version (W suffix) is specially recommended for use on inductive loads, thanks to their high commutation performances.

By using an internal ceramic pad, the BTA series provides voltage insulated tab (rated at 2500V<sub>RMS</sub>) complying with UL standards (File ref.: E81734).

In order to meet environmental requirements, ST offers these devices in ECOPACK® packages. These packages have a Lead-free second level interconnect . The category of second level interconnect is marked on the package and on the inner box label, in compliance with JEDEC Standard JESD97. The maximum ratings related to soldering conditions are also marked on the inner box label. ECOPACK is an ST trademark. ECOPACK specifications are available at: <a href="https://www.st.com">www.st.com</a>.
